

Class Compass Privacy Policy

Introduction

Class Compass is an educational assessment platform designed for schools. This policy explains how data is collected, used, and protected.

Data Controller and Processor

Schools using Class Compass act as the Data Controller. Class Compass acts as the Data Processor.

Data Collected

We store pupil names, assessment data, and limited demographic indicators such as PP, SEND, and attendance.

Purpose of Processing

Data is processed solely for tracking pupil progress and supporting teaching and learning.

Data Storage

Data is securely stored using Supabase (PostgreSQL) and hosted on Render infrastructure.

Data Retention

Data is retained only while the school uses the service. Schools may request deletion at any time.

User Access

Access is restricted to authorised school staff. Executive admin accounts are used only for system management.

Security

We use secure authentication and role-based access to protect data.

Rights

Schools can request access, correction, export, or deletion of data.

Contact

For data enquiries, contact the system owner via the application.
